

# Reduce costs and emissions Let's work together

**We're teaming up  
with municipalities on  
sustainable solutions**

## How we're investing in Ontario communities:

### **Safe, reliable energy to heat homes and businesses**

We're making affordable natural gas available to more communities across Ontario.

### **Safety, environment and community investment**

From social initiatives to emergency services, we're committed to the communities we serve.

### **Programs and incentives to cut costs and reduce emissions**

We've helped over 170,000 customers save money and energy.

### **Innovative, low-carbon energy solutions**

We're investing and advancing Ontario's clean energy transition.

# Teaming up for a cleaner energy future

## We're advancing and investing in sustainable, low-carbon solutions

### Greening your gas supply

#### Renewable natural gas (RNG)

With expertise and capital support, we help customers turn food scraps, farm waste and sewage into carbon-neutral RNG to fuel municipal fleets and heat homes and businesses.

#### Renewable hydrogen

We're working with partners to use surplus electricity to produce, store and blend renewable hydrogen into the natural gas system.

### Conservation programs

#### We're helping homes, businesses and industry save

Through incentives and expert help, our conservation programs have saved over 56 million tonnes of greenhouse gas emissions and helped over 170,000 customers reduce costs and their carbon footprint.

### Low-carbon technologies

#### Carbon-neutral fleets

With no upfront capital required, our market-ready Municipal Transit program can help municipalities drive down costs and emissions with compressed natural gas (CNG) and compressed RNG—a low-carbon alternative to diesel.

#### Geothermal

With our turnkey geothermal program, municipalities are reducing on-site emissions with a low-carbon, renewable solution to heat and cool homes and buildings.

### Investing in municipalities

#### Community expansion

Today, more Ontarians have access to safe, affordable, reliable natural gas.

#### Community investment

From social initiatives to partnerships, we're committed to the communities we serve.

#### Emergency services and support

Our emergency response team helps keep communities safe.

## Strengthening communities for more than 170 years

Today, 75 percent of Ontario households rely on natural gas. Natural gas is essential to enable renewable energy, fuel critical industries and make Ontario more resilient.

### About Enbridge Gas

- **Canada's largest** natural gas distribution company.
- **170+** years delivering natural gas safely and reliably.
- **3.8 million** customers in 355 municipalities.
- **+75%** of Ontario homes are heated with natural gas.
- **Low-carbon solutions** – conservation, green fuels and clean tech for heating and transportation.
